Experience

Code Differently

Software Developer Intern

Wilmington, DE

June 2025 – August 2025

- Developed a user-friendly web application enabling intuitive control of drones through python scripting, designed to make drone programming accessible to users of all skill levels; this was taught to middle school students exploring programming for the first time.
- Earned IC3 Certification while expanding professional skills, including effective communication and teamwork, gaining valuable insight into workplace dynamics and collaboration with colleagues and supervisor.

Buccini Pollin Group

Information Technology Intern

Wilmington, DE

April 2024– August 2024

- Analyzed and modeled financial data for a real estate property using excel to create projections and cash flow reports, demonstrating strong analytical skills and proficiency in data-driven decision-making to optimize business outcomes.
- Collaborated in cross-functional business meetings, including discussions with former Mayor Mike Purzcki, refining communications and presentation skills essential for translating technical solutions to diverse stakeholders in a professional environment.

A.I Whoo

Research Assistant

Newark, DE

March 2024 – May 2024

- Applied and enhanced AI technologies to support diverse client projects during a work-based internship, gaining practical experience in machine learning algorithms and AI-driven solutions aligned with career goals in software development.

Leadership Experience

Wilmington Parks and Recreation Park

Master of Ceremonies

Wilmington, DE

June 2025 – Sept 2025

- Guided 250+ students through breakout sessions on leadership and personal growth at the Next Level Youth Summit, inspiring them to create meaningful change in their communities.

Student Government

Secretary

Newark, DE

Sept 2023 – Sept 2024

- Served as a secretary for the Student Government at Newark High School, leading the planning, communication, and marketing efforts for major events like homecoming; demonstrated strong organizational, teamwork, and project.

Projects

AI Web Scraping Engine | Python, Poetry, Crawl4ai, Pydantic AI, Azure Foundry, Selenium, Chroma DB, BS4

- Engineered production-ready multi-agent web scraping system capable of intelligently extracting and structuring data from thousands of pages, reducing manual research time from weeks to hours while maintaining 95% data accuracy.
- Designed a modular ETL pipeline with real-time data validation and cleansing using Pydantic schemas, delivering analysis ready datasets to business intelligence teams and enabling data-driven decisions.

BetterCalendar | JavaScript, OAuth 2.0, Google Calendar API, Chrome Extensions, NLP

- Implemented an AI-powered Chrome extension that automates Google Calendar scheduling through natural-language input, helping users create and organize events 3× faster while improving scheduling accuracy from 90 % to 94 % in the premium version with advanced AI parsing and contextual understanding.
- Developed a production-ready architecture integrating Google Calendar API, OAuth 2.0, and Chrome Storage/Identity APIs, featuring secure authentication, asynchronous event automation, and seamless multi-device syncing within a responsive UI.
